**VIA ELECTRONIC AND
OVERNIGHT MAIL**

Mr. Randy Sturgeon (3HS23)
United States Environmental
Protection Agency, Region III
1650 Arch Street
Philadelphia, Pennsylvania 19103-2029

**Re: Response of The Peck Company to Request for Information Pursuant
Under Section 104(e) of CERCLA With Regard to Peck Iron and Metal
Property, 3850 Elm Avenue, Portsmouth, Virginia**

Dear Mr. Sturgeon:

On behalf of The Peck Company (hereinafter "Peck"), this is the response, as of the date set forth above, to the letter from Dennis P. Carney dated January 13, 2006, and received by Peck on March 6, 2006, requesting information with regard to the Peck Iron and Metal property in Portsmouth, Virginia (hereinafter the "Information Request").¹ We are submitting this response in our capacity as counsel for Peck. Peck understands that it has a continuing obligation to supplement this response if additional information becomes available, and Peck reserves the right to submit additional information that it may find to be responsive to the Information Request.

Set forth below are each question contained in the Information Request in ***bold-faced, italicized type***, followed by Peck's response as of the date of this letter.

¹ The Information Request called for a response within 30 calendar days of the date on which we received it. In a letter to Dennis Carney sent on March 17, 2006, David Peck requested an extension until May 5, 2006, to submit Peck's response. On behalf of EPA, Mr. Carney granted this request in a letter sent to Mr. Peck on March 28, 2006. Patricia Miller granted Peck an additional extension until May 10, 2006, which I confirmed in an e-mail to Ms. Miller on May 3, 2006.

Mr. Randy Sturgeon
May 10, 2006
Page 2

1. ***As it relates to the Site, what is the current nature of your business or activity or any other business or activity that may be taking place at the Site?***

RESPONSE:

Currently a minority owned business, Able Body Demolition, is using the property to store its trucks. Able Body also has unloaded inert material, including concrete, dirt, and asphalt, on the property, and has spread some of the piles of asphalt and concrete. The company has followed Peck's instructions not to remove any soil from the site, and to keep any visitors or vandals off the site.

2. ***As it relates to the Site, what was the nature of any business or activity during the period of time you or any member of the Peck family, or a company substantially owned or controlled by the Peck family, either owned and/or operated the Site?***

RESPONSE:

From 1945 to approximately 1990, the business conducted at the property was the purchase, processing, storage and shipping of metal scrap from various military bases, other federal, state and local government agencies, and local businesses. Liquidation of remaining scrap materials off of the property continued into the early 1990s. In addition, Peck Equipment Company was established in the 1960's to locate hard-to-find parts for the U.S. Navy.

In a letter from S.G. Werner to D.S. Welch of EPA dated May 11, 2004, Mr. Werner provided an historical summary of Peck's activities at the property. This letter also was provided as an attachment to an e-mail from S.G. Werner to K. Bunker dated July 28, 2004.

3. ***Describe how the size or property boundaries of the Site have changed since the inception of Peck activities at the Site.***

RESPONSE:

Some time during the period between 1945 and 1950, Peck acquired land adjacent to the original parcel. In the 1990's, less than an acre was acquired from the U.S. Navy. In 2003, Peck donated a conservation easement of approximately six acres along Paradise Creek to the Elizabeth River Project ("ERP"), which modified the land to serve as a wetland and forested buffer area. In the course of its work, the ERP removed a berm, dredged soils, re-contoured the area, and deposited soil back on other portions of the Peck property.

Mr. Randy Sturgeon
May 10, 2006
Page 3

The current 33 acres are on five parcels. The following table summarizes the title history of the current property.

Mr. Randy Sturgeon
May 10, 2006
Page 5

4. ***Explain how hazardous substances such as, but not limited to, polychlorinated biphenyls (PCBs) and lead came to be present on the site.***

RESPONSE:

The metal scrap purchased during the period of scrap metal operations consisted of damaged and obsolete equipment, attachments, parts, and other miscellaneous materials. At various times the scrap contained cadmium-coated automobile parts; lead as an additive in petroleum products; PCBs in insulated wire, gaskets, fluorescent lights, transformer oil, and household appliances that used capacitors; lead-based paint in scrapped bridge sections; and lead in automobile batteries. Metal scrap from the government was not cleaned or purged of hazardous substances before transfer to the Peck property.

5. ***Provide all information regarding the current or past environmental and physical conditions at the Site including but not limited to geology and hydro-geology, soil, groundwater, surface-water (including drainage patterns), sediments, sewer systems, and storm water conveyance systems. This includes, but is not limited to, field observations and measurements, laboratory data, field screening data, boring logs, sample locations and dates.***

RESPONSE:

Physical and chemical data for the property have been submitted to the Virginia Department of Environmental Quality ("DEQ") and EPA. Peck believes that information provided to DEQ and EPA through December 2004 confirmed that there are discrete locations on the property with elevated concentrations of certain parameters, but that there would be no unacceptable risk to the environment or to humans if the property were covered with a cap and restricted as to future use. Furthermore, there were no indications that the property would endanger anyone if left undisturbed. A risk assessment prepared for Peck indicates that there would be no unacceptable risks to humans or the environment or the likelihood of a release to groundwater even if it were assumed that there are PCB concentrations of up to 5,000 mg/kg in the former metal processing area.

The following table lists reports and other communications by which EPA and/or DEQ were provided information responsive to this question. Peck is not submitting copies of these reports and communications with this response but will provide them to EPA upon request.

Peck is submitting to EPA with this response the laboratory data reports for samples collected at the property during 2005.

6. *Provide all documents that show the types of material accepted, customers, operational periods, and description of operations (including locations of operations) both owned and/or operated by you or any tenant(s).*

RESPONSE:

Peck has no documents in its possession responsive to this question. The following provides a brief description of operations on the property based on David Peck's recollection.

The operations at the property until the 1980's were located in and around the cinderblock buildings in the center of the property. At one of the buildings, a hydraulic guillotine shear cut steel to size. One building served as a sorting and storage room for non-ferrous metals and contained a small aluminum furnace to melt aluminum scrap. In the front, by the stop light, was a men's locker room and machine shop. A weigh scale was outside an office trailer near the stop light.

During the period of scrap metal operations on the property, the Department of Defense processed and sold metal scrap to Peck Iron & Metal from various military bases and Navy yards, including: Norfolk Naval Shipyard; Naval Air Station; Oceana; St. Juliens Creek; Cheatham Annex; Yorktown; Quantico; Ft. Meade; and Bellwood. The General Services Administration, Coast Guard, NOAA, and other agencies of the federal government also regularly sold surplus material to Peck Iron & Metal. Other large, non-government sellers to Peck Iron & Metal included the railroads, Virginia Electric and Power, landfills (which were

Mr. Randy Sturgeon
May 10, 2006
Page 10

sources of white goods and miscellaneous scrap), and the ship repair facilities, including Newport News Shipbuilding and Drydock, Norfolk Shipbuilding, and Moon Engineering.

Two occupants of the property -- neither affiliated with Peck -- in approximately 2001-02 operated businesses involving the handling of equipment and perhaps scrap metals. One occupant's operation led to action by DEQ, after which Peck evicted the occupant from the property. Currently, Able Body Demolition is using the property for truck storage and is helping to keep the property secure.

7. *Provide any correspondence to or from local, state or federal governments that discuss environmental conditions or issues at the property. This could include, but is not limited to, information regarding inspections, permits, violations and discharges.*

RESPONSE:

At the time Peck entered the Virginia Voluntary Remediation Program, its past and current environmental data were provided to DEQ. The history was also carefully reviewed by the Elizabeth River Project before it accepted approximately seven acres for a conservation easement.

The following table lists reports and other communications by which EPA and/or DEQ were provided information responsive to this question. Peck is not submitting copies of these reports and communications with this response but will provide them to EPA upon request.

08-Dec-05	Peck, B.D. & Gant, Rene	Sturgeon, R.	Response to Peck's Dec-05 letter

8. *Provide information regarding modifications made to the property, including, but not limited to, areas of fill, areas where the topography was modified, areas of burial and/or dumping, and areas of construction and/or demolition.*

RESPONSE:

Peck demolished a building at the entrance to the property at 3500 Elm Avenue in response to a demand by the N&P Beltline. In addition, part of the former Proctor & Gamble masonry building near that entrance was demolished within the last ten years.

Inert material was dumped on the site by various contractors during the past ten years. If trash or suspect material was found, contractors were employed to remove the material for disposal at a landfill. Able Body Demolition spread inert concrete, asphalt, and soil on the property during the past few months. Any suspect soil or other material was to be placed in the area of the buildings where scrap metal processing operations once occurred.

Please also see the response to question 3 above.

9. *Provide all information on the current and recent use of the Site including actions such as, but not limited to, the storage of soils, material or equipment, or modification or movement of soils or sediments located on the Site.*

RESPONSE:

Please see the answer to question 8 above. In addition, during 2005, Able Body Demolition excavated certain areas of soil, moved the materials to the former operations area, and subsequently covered the area with inert materials. Able Body personnel were warned of the

Page 22

nature and potential danger of the excavated soil and were instructed about where on the property the soil should be placed.

- 10. *Provide the names, titles, areas of responsibility, addresses and telephone numbers of all persons that worked at the Site for longer than three years.***

RESPONSE:

Stanley Peck and Aaron Peck worked at the property for a period of time until the early 1990s. Their current addresses and phone numbers are:

Stanley J. Peck

Aaron M. Peck

Personnel records from the period of active site operations were not retained.

- 11. *If you have any information about other persons/entities who may have information which may assist the Agency in its investigation of the Site or who may be responsible for the generation of, transportation to, or release of contamination at the Site, please provide such information. The information you provide in response to this request should include the person's entity's name, address, type of business, and the reason(s) why you believe the party may have contributed to the contamination at the Site or may have information regarding the Site.***

RESPONSE:

Peck has no additional information responsive to this question.
